Drawn. Vonnegut's daughter put his artistic works in a new book

Kurt Vonnegut is known for his satirical novels. But he was an equally talented artist who first published his graphic art in his novels "Slaughterhouse-Five" and "Breakfast of Champions." Now, his drawings are bound in the book "Kurt Vonnegut: Drawings," which features an introduction by his daughter, Nanette Vonnegut.

At a special exhibition and book signing May 14 at the Margo Feiden Gallery, Nanette told us more about her father's work:

What is your favorite drawing by your father, and why?

My favorite is the self-portrait [pictured]. It is one continuous line that includes so much: a window with a blue flower in it, buttons on his shirt and his signature. I love it because it looks exactly like him and because it is beautifully integrated as a piece of art. I can tell he

The novelist's drawings are now available in book form in "Kurt Vonnegut: Drawing." PROVIDED

had a lot of fun with that one.

Why do you think your father's legacy holds strong today?

My father has such holding power on so many because he speaks timeless truths about who we are as human beings — our failings as well as our potential for good. While doing all that, he manages to make us laugh out loud in recognition. ... That is his enduring genius.

Does your father influence your writing and art?

I am always surprised to see his voice show up in my writing and in my art. So much of him is in my bones, whether I like it or not. I think in trying to find my own voice, I have finally allowed his to be there as a low hum, weaving its way in and out of whatever I do. I have to tell stories even in making pictures.
